DETAIL OFFICE ACTION

1. This office action is in response to the amendment filed on January 14, 2005.

Restriction

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
- I. Claims 1, 2, 6, 8, 9 and 11, drawn to a navigation method for providing navigation which includes the menu with which a user specifies an area of a map over which map data are to be updated, classified in class 715, subclass 810.
 - II. Claims 3-5, drawn to a processing method to be adopted in a navigation system, classified in class 701, subclass 211.
 - III. Claims 7 and 10, drawn to a map data management apparatus which includes a map data management means and an updated data providing means, classified in class 709, subclass 223.
 - IV. Claims 9, 12 and 13, drawn to a map data management program to be used in a navigation system which includes the steps of executing a route search from a current position to a destination on a map, classified in class 701, subclass 201.
3. The inventions are distinct, each from the other because the inventions I, II, III and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions. Group I, refers to a navigation method for providing

navigation which includes the menu with which a user specifies an area of a map over which map data are to be updated; while Group II describes a processing method to be adopted in a navigation system which includes displaying a plurality of options, displaying a plurality of roads, obtaining updated data and executing process by using the obtained data, Group III describes a map data management apparatus which includes a map data management means that manages map data so that a memory volume does not exceed a predetermined maximum value and handles meshes with history information to be used to determined update statuses and an updated data providing means, and Group IV discloses a map data management program to be used in a navigation system which includes the steps of executing a route search from a current position to a destination on a map.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to examiner Tan Nguyen, whose telephone number is (571) 272-6966. The examiner can normally be reached on Monday-Thursday from 5:30 AM-4:00 PM.
